YEAR BOOK OF THE
NEW BEDFORD TEXTILE INSTITUTE
NEW BEDFORD, MASSACHUSETTS

PUBLISHED BY THE SENIOR CLASS

Editor-in-Chief

RAYMOND E. LAROCQUE

To record events and familiar happenings as they occur during these student years is to arrest the inexorable fleetness of time; to contain within a phrase the illusiveness of warm friendly relations; to hold in suspension wit and humor and young laughter; to recreate a moment pregnant with animation; to attempt all this has been our purpose.

THE 1953
FABRICATOR STAFF

Foreword

We Dedicate

with
Deep Gratitude and
Sincere Respect

this
the Fabricator of 1953

to
John E. Foster
President

who
has unselfishly given so much
of his time to the welfare of
the students and to the ex-
pansion of the Institute, and
under whose guidance we feel
that New Bedford Textile
Institute will attain higher
academic standing.

June 5, 1953

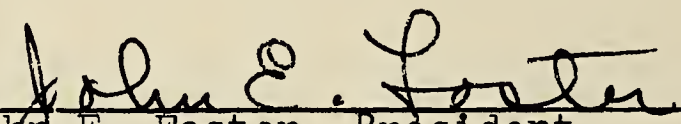

To the Class of 1953:

To those of us who have aspired to a certain goal, we have a deep feeling of satisfaction when we have successfully met the challenge. The members of the class of 1953 should take a great deal of pride in having accomplished that which they set out to do several years ago.

Let me remind you, however, that you are embarking on a new and far greater adventure, one that will not span a few short years but one which will determine your mettle. That adventure is the career of life, with a test far more important and decisive than that of the classroom.

I feel that you as graduates of the New Bedford Textile Institute will meet that challenge and pass the test.

With best wishes,

John E. Foster, President

JEF:ed

At this time I should like to make one final request of the Class of 1953-- that it continue to interest itself in the development of our Institute. As members of the Alumni, it can and should participate generously toward making possible for the Institute the realization of higher aims... For those who are to follow you, let us know-- by what means we can help them to meet more successfully their own... commencement... On this occasion-- your own commencement of a new and wonderful experience, I extend to you my best wishes.

Augustus Silva
Dean of Students

Remember

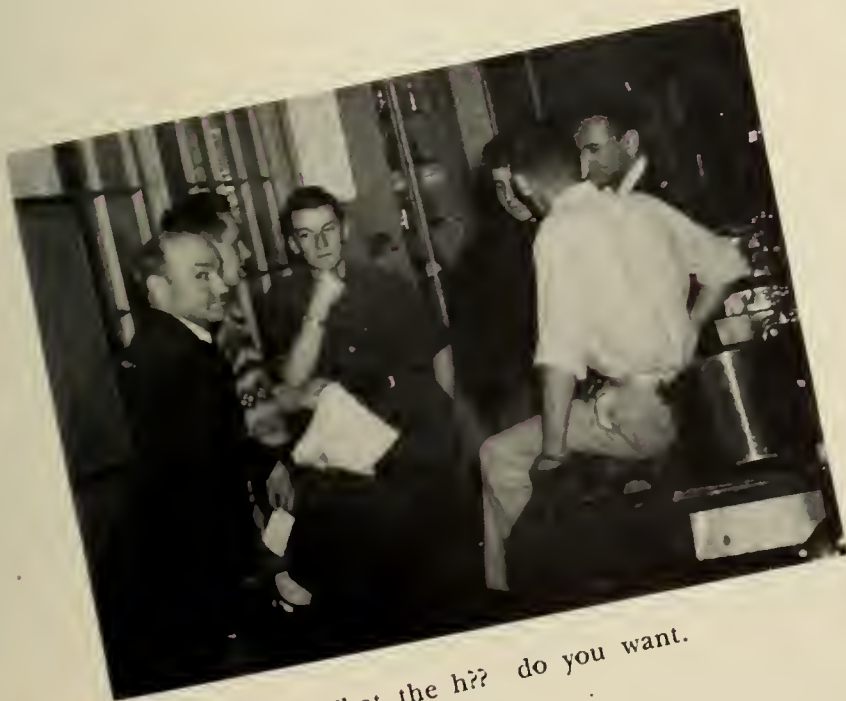

Politics is the subject.

First day.

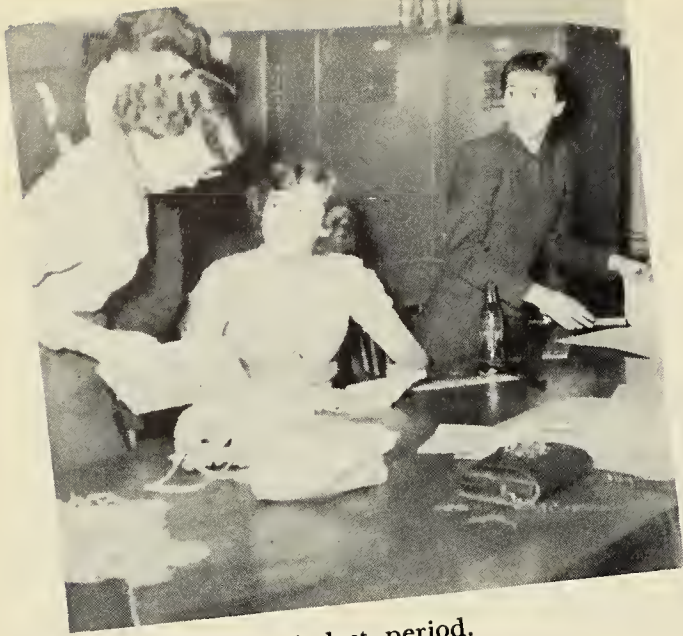

Books are on order.

What the h?? do you want.

Getting to know you.

A lost period.

Delta Kappa Phi talent show.

Going for the extra ball.

Cloutier's assistant.

Has anyone got a box?

I'll prove it to you.

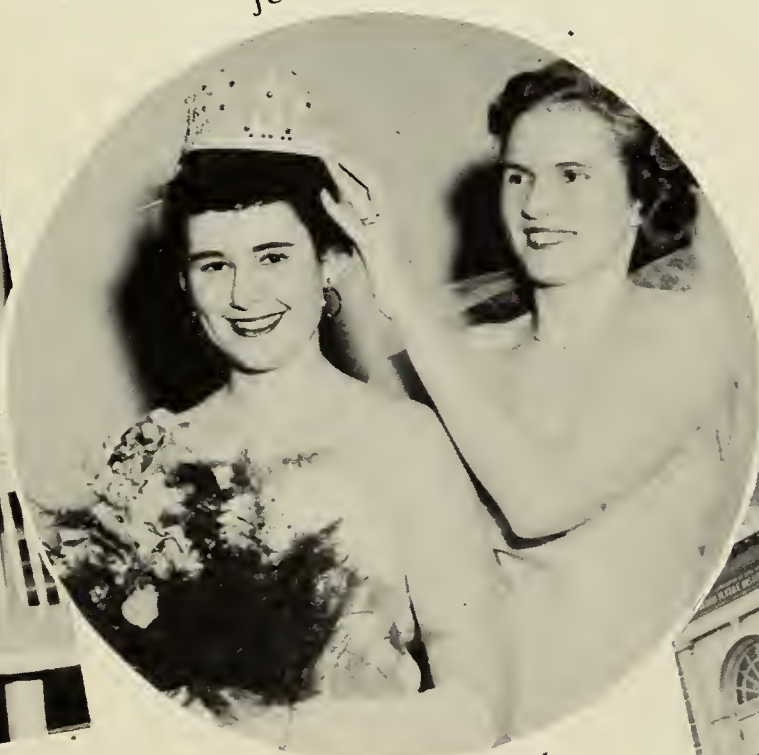

Our glamor lovelies.

Free period for Mr. Tinkham.

Work all night, sleep all day.

Queen ANN MACKAY

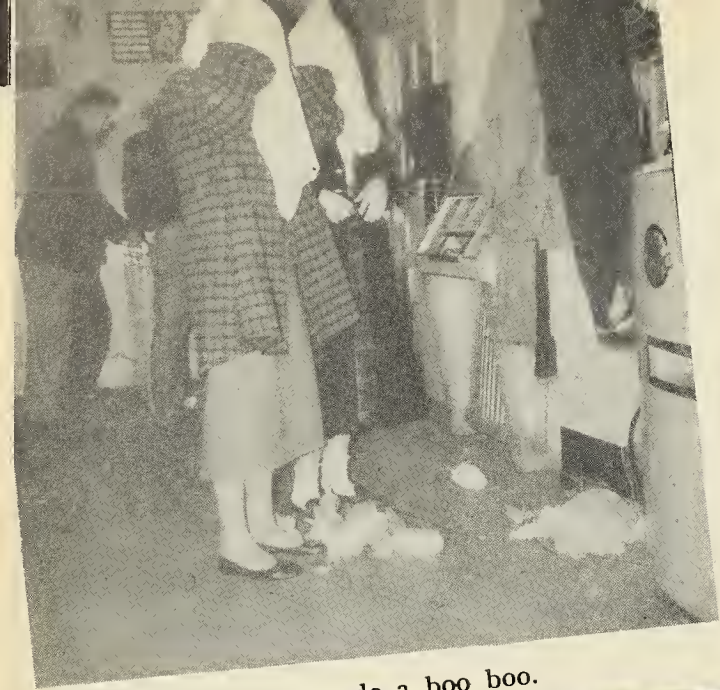

Ladies swing vote.

Another lecture.

Will you take us for a ride?

Oh! We made a boo boo.

A chinese puzzle.

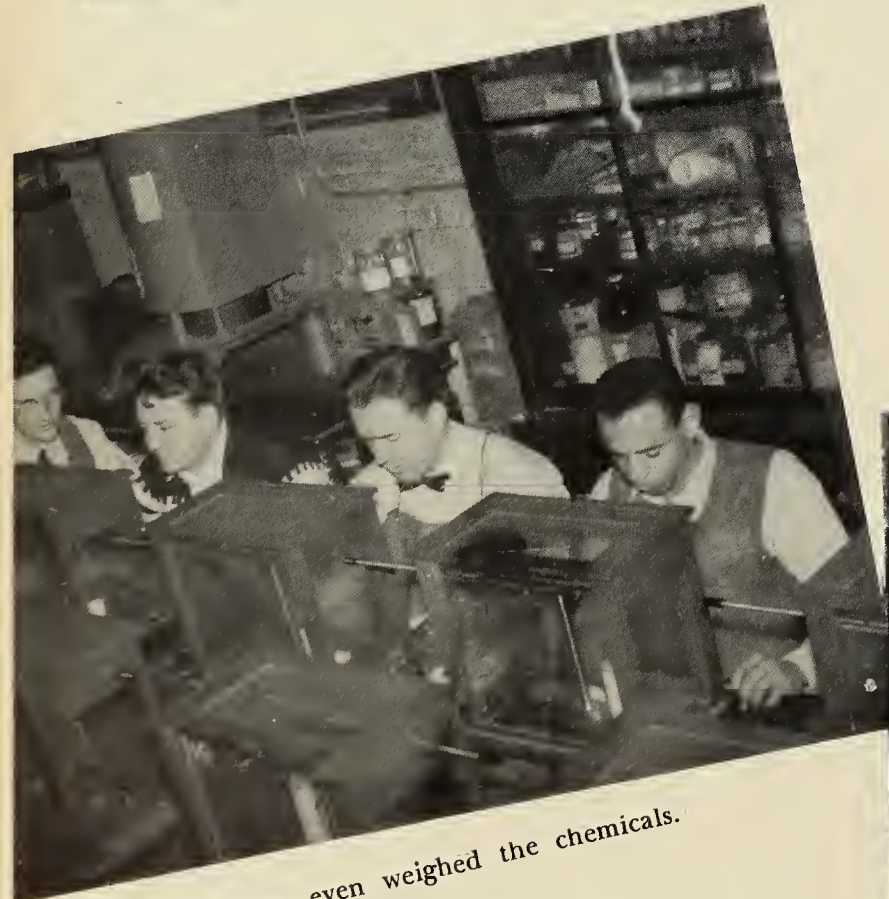

College Grill.

Our Dagmar.

Senior class pow wow.

Some even weighed the chemicals.

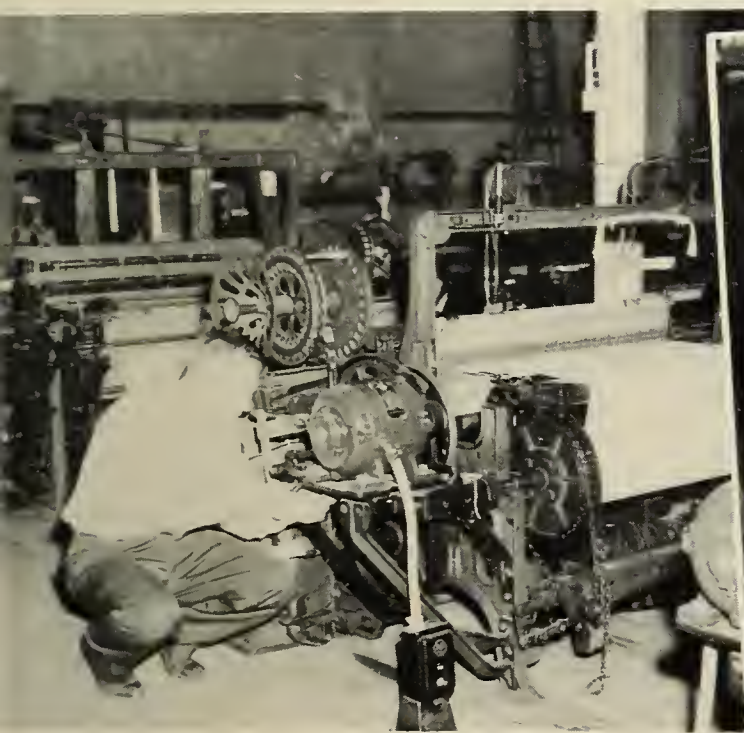

Another girl Ray!

Coffee time.

Where's the rest of the class.

Room Six.

Chemistry lads getting hungry.

THE END.

STUDENT COMMITTEE

The Student's Committee of the New Bedford Textile Institute is composed of all the class officers. Its purpose is threefold: (1) to represent the student body, (2) to procure benefits for the student body and the institute, and (3) to sponsor student activities financed through the Student's Committee Fund.

The events sponsored by the committee included a buffet luncheon held in December in the school gymnasium. A student participation talent show followed the luncheon. Also included among the Student Committee's activities was a Barn Dance held in April.

This year the Student Committee had undertaken many projects and was successful in procuring a pay telephone and a milk machine for the benefit of the student body. The proceeds from utilities go into the Student Committee Fund. The committee was also influential in establishment of a student's personality rating and a dean's list.

The members of the Student Committee wish to extend their best wishes to the graduating class of 1953.

INTER-FRATERNITY COUNCIL

The Inter-Fraternity Council was formed in 1947 by the three fraternities and the sorority to bring about a closer coordination of social, educational, and professional activities within the institute.

The Council is composed of twelve members, three from each of the fraternities and the sorority, who serve for the duration of one school year as representatives to the meetings of the Council. At the first meeting, a chairman, a secretary, and a treasurer are chosen from the twelve representatives. A faculty advisor, selected from the instructors at the institute, is chosen by the council members to serve for the term of one school year.

Each year the council draws up a calendar of social events for the forthcoming semester. Each group submits a list of prospective dates to the council, and if there are no conflictions within the group, the calendar is sent to the Faculty Committee on Controls for approval. If there are no further complications with other school groups, the dates are considered accepted.

The big event of the first semester was a Semi-Formal Dance. Louis Queen and his orchestra provided the music for the successful affair, which was held in the Ballroom of the New Bedford Hotel. Highlight of the evening was the crowning of Mr. and Mrs. Joseph Sears as King and Queen.

The Inter-Fraternity Council and its members take this opportunity to wish the graduating class the best of luck in all their future undertakings.

SORORITY

The Beta Chapter of Kappa Sigma Phi Sorority opened the school social year with a Get-Acquainted Party for all the girls of the school. All those attending had a good time and made many new friends.

In November, bids were sent to non-members and five acceptances were received. Hazing took place the week of November 17. Some of the highlights were "Air-Raid Day", the talent show in the auditorium, singing (???) on the front steps, and a parade to the center in costume. The Three Red Ink Spots, a sweet Chinese lady, and a mechanic were the eye-catching new members during Hell Week. After hazing, a formal installation of new members and a dance at the Mattapoissett Manor, attended by sisters from Bradford Durfee Technical Institute, were held on November 22.

Our membership thus enlarged, we held our annual faculty luncheon on December 15. After the delicious meal, Mr. Molyneux and Mr. Beardsworth entertained our guests. As usual, following this luncheon, the sorority lounge was left open to the student body for the remainder of the week, and judging from the way the rest of the coffee and sandwiches disappeared, the male contingent greatly appreciated this.

Keeping in line with the Christmas theme, Kappa Sigma Phi undertook for the first time the filling of a food basket for a needy family in New Bedford, and also sponsored a collection for the children of St. Mary's Home and offered it to them as a Christmas token. Both efforts were greatly appreciated by the recipients.

Second-semester activities included a dance sponsored in conjunction with Sigma Phi Tau Fraternity, the annual weiner roast, and the election and installation of new officers.

Kappa Sigma Phi Sorority wishes to thank the students and faculty of New Bedford Textile Institute for their cooperation this year and to extend best wishes to the Class of 1953.

DELTA KAPPA PHI FRATERNITY

Delta Kappa Phi Fraternity began its 1952-53 season with a new slate of officers, namely Robert Sala, Consul; Ted Murphy, Pro-consul; Richard Lafferty, Annotator; James Siddall, Treasurer; Robert Lomax, Scribe, and Steven Vazopoulos, Sergeant at Arms.

The "DEKES" started off the year with a testimonial banquet for Professor John Foster, a member of Delta Kappa Phi, who was elected President of New Bedford Textile Institute. Many active and alumni members attended the banquet and presented Brother John Foster with an over-night bag.

The months of September through November were busy with rehearsals for the Delta Kappa Phi Minstrel Show, which was presented on December 6. The minstrel show was a great success as the student body, faculty and friends really enjoyed themselves that night.

Delta Kappa Phi held its first Open House December 11. The evening was highlighted by the presence of seventy-five non-fraternity men along with the active chapter members, a few alumni and eleven of the school's instructors who are members. The program consisted of movies and refreshments.

Bid Week proved to be successful as twenty-six pledges suffered through Hell week and the First and Second Degrees. The pledges received their Third Degree on March 22, at a formal banquet held at the Marion Steak House.

Came the weekend of April 24 and the brothers of the Delta Chapter were host to the 54th. Annual National Convention of the Delta Kappa Phi Fraternity in New Bedford, Mass. Many old acquaintances from the previous years at Raleigh, N.C. and Philadelphia, Pa. were renewed and new ones made. A tour of the city, institute and Whaling Museum was made on Saturday. The convention wound up with a banquet on Saturday night.

We closed out the fraternity year with the annual clambake which was held at Perry's Grove. The highlight of the affair was a baseball game between the alumni and faculty versus the student members; the old timers won.

Delta Kappa Phi looks forward to the coming 1953-54 season for another year of school fun and fellowship, and wishes its members of the departing class and all the seniors the best of luck.

PHI PSI FRATERNITY

Beta Chapter, Phi Psi Fraternity, began the 1952-53 school year with an active membership of 46 brothers.

The chapter's social calendar commenced with our Annual Fall Dance held in November at the Moose Hall. Soon to follow was our Christmas Party Dance at the Mattapoissett Manor. Also during the month of December, a dinner was given at Stevenson's in honor of Mr. Peter C. Wayner, superintendent of the New Bedford Gilt Edge Silk Mills, and Mr. Robert E. Tobin, plant manager of the Hathaway Mfg. Co., of New Bedford. They both were accepted into the brotherhood of Phi Psi with Honorary Degrees.

In February 20 pints of blood were donated by the brothers to the Red Cross. This marked the second year that Beta Chapter donated blood in commemoration of Brother Bill Liolin who was killed in Korea two years ago.

During the month of March, the new pledges were given their first, second and third degrees. Beta Chapter accepted five new brothers and

conferred the third degree upon them at a banquet held at Beaconsville Hotel in Boston. This affair was held in conjunction with our brothers from Delta Chapter at Fall River and Gamma Chapter at Lowell. On March 18, the brothers of Beta Chapter elected their new officers: they were John Smith, president; William Etchells, vice-president; William Silveira, secretary and Eugene Cote, treasurer.

In May Beta Chapter, along with its fellow brothers throughout the nation, both alumni and active, traveled to Philadelphia, Pa. to celebrate the 50th. Anniversary of the founding of Phi Psi Fraternity. This year witnessed the greatest gathering ever to participate at the annual conventions.

To close the school year, Beta Chapter held its annual Dine and Dance party to extend best wishes to its departing brothers.

Beta Chapter, Phi Psi Fraternity, wishes the best of health, luck and fortune to the class of 1953.

SIGMA PHI TAU FRATERNITY

Beta chapter of Sigma Phi Tau has enjoyed twelve months of helpful and joyful activities since the last edition of the Fabricator.

We started the year off with a new form of initiation. This year Sigma Phi Tau adopted the "Help Week" idea, instead of the usual "Hell Week." We found this new idea worked out very well. The pledges spent many hours at St. Luke's Hospital doing various menial tasks. The day will long be remembered by the pledges: They really worked!

A few weeks later the fraternity in conjunction with another fraternity went out to Sol-e-Mar Hospital for Children and laid a full-sized playground for the children at the hospital. After the hard day's work, we celebrated with a big party. A wonderful time was spent by the brothers and their dates who attended the get-together.

On May second our annual installation dinner was held at the "Harbor" in Marion. The incoming officers were sworn into office after a scrumptious turkey dinner was served to the brothers; both alumni and active were invited. This dinner also turned out to be our farewell party for the graduating brothers of the fraternity.

As the present school year began we looked forward to even greater heights. The agenda started us off with a stag party for our prospective pledges. Refreshments were served and movies were shown to the enthusiastic turnout of both active and alumni brothers aside from the guests of the evening.

On the fourteenth of March we held a dance with the sorority. Everyone who attended had a wonderful time. The evening passed all too quickly with the rhythms of Paul Brun and his orchestra.

The fraternity would like to thank all of the alumni who attended our meetings and social gatherings throughout this past year, and sincerely hope that they will continue to take such and active interest in our activities in the future. We also would like to wish our alumni brothers serving in the armed forces all the luck and good wishes in the world.

Sigma Phi Tau extends best wishes for success and happiness to all members of the graduating class of 1953.

ENGINEERING CLUB

The Engineering Club was organized in the Fall of 1951 by the members of Machine Design Classes of 1952 and 1953. The purpose of the Engineering club is to further the knowledge and education of the engineering student. It will also be a means of bettering the business contacts between the student engineer at the institute, and the related industries.

There are several aims and objectives that the Engineering Club strives for. These aims and objectives are: to obtain a broader perspective in engineering; to create a closer relationship between ourselves and industry and to attain a closer correlation between theory and practice.

At our first meeting on March 4, 1952, the first slate of officers elected were Raymond St. Pierre, president; Joseph Sargent, vice-president; John Rocha, secretary; David Pearson, treasurer and Gardner Fassett, corresponding secretary.

For the present 1952-53 school year, the officers presiding were Lee C. Calderwood, president; Joseph Carando, vice-president; Raymond L. Blanchard, secretary; Edward Furtado, treasurer and Gardner Fassett, corresponding secretary. The club was honored and delighted when Assistant Professor Howard Tinkham, acting Head of the Engineering Department, accepted to be our faculty advisor. Mr. Fassett was appointed to gather material of a technical nature to start a library for the use of the engineering students. The library has grown by leaps and bounds and we hope that in the future we shall have literature on all types of engineering data.

The activities of the club consisted of movies and meetings which were conducted in room #4, at the institute, throughout the year. Our first movie was one called "Multipress and How You Can Use It." This movie was shown at our meeting on October 30, at which time, we took in thirteen new members.

The Engineering Club has been instrumental in adding several new courses to our curricula. These courses are electronics and differential equations. Other achievements were to incorporate a personality rating in every student's record and to help establish a Dean's List at the institute.

The final event of the year was our meeting in May at which time new officers were elected. On this occasion a prominent industrialist was invited as guest speaker.

The Engineering Club wishes to extend best wishes to the Class of 1953.

Basketball

The New Bedford Textile's Basketball Team had one of the best seasons in many years. The team's record was 18 wins and 3 losses. The team compiled 1,687 points in 21 games, giving it an average of 80 points per game. Their opponents, however, gained only 1,219 points for a game average of 58 points. The seniors on the squad were Raymond Blanchard, Harold Wrench and Gerald Escolas.

The first game of the season found Coach "Fran" Tripp's boys in excellent shape as they rolled to an easy victory over Massachusetts Maritime Academy. The Raiders, led by Harry Wrench and Dick Julio, built up an early lead and then coasted on to a 62-32 final score.

New Bedford next took on Bridgewater State Teachers College and defeated them to the tune of 65-46. The reserves played a prominent role in this game as every member of the team entered the scoring column.

The Providence Bible Institute proved to have a weak team as the Raiders easily won their third straight game. The reserves, led by Wrench, Escolas, Julio, and Antonietta, again played most of the game. The final score was 81-44.

The fourth game found the Red and Grey traveling to Worcester to take on the Worcester State Teachers. Here again the Textile team showed their strength as they romped to a 75-50 victory. Dick Julio and Dick Lafferty led the team in scoring with 18 and 16 points respectively.

Durfee Technical Institute was the next visitor to the Raiders' gym. The game was close for the first three quarters, but the Raiders soon showed their superiority by pulling away in the closing quarter. Vern Gomes led the team with a sparkling 27-point performance, while Captain "Red" Blanchard and Joe Barbero contributed 14 points each. The final was 79-61.

The Trippmen gained their third Conference victory and their sixth straight win as they downed Gordon College by the score of 87-70. The Trippmen got off to an early lead and the outcome seemed certain for them. Gordon's team was exceptionally tall, but could not cope with the accurate shooting of Don Thatcher and the fine defensive play of Captain Red Blanchard.

New Bedford's next foe, Roslyn Air Force Base, was taken into defeat easily as the Raiders belted the team with a final score of 90-52. The regulars rested most of this game as the reserves took over and played their opponents evenly.

Bryant College was host to New Bedford in Providence as the Raiders moved slowly in the first quarter. At the end of the first quarter it looked as if New Bedford were going to meet with its first defeat of the season. Bryant was leading at this time 17-14. Gomes, Blanchard, Barbero, and Julio soon found their marks during the second canto and gradually pulled away from the home team. The Raiders left the floor at the end of the game victorious by the count of 73-58.

Dick Julio paced the attack against Rhode Island School of Design as the New Bedfordites chalked up their second highest score of the season in defeating their host 101-64.

Returning to Conference play the Raiders took on Bridgewater again and defeated them 85-69.

In a benefit game played at Wareham, the Raiders defeated an All-American Girl's Team 44-41. The Raiders were very gentlemanly in their ball handling and scoring.

In racking up their 11th straight win against Rhode Island School of Design, The Raiders also recorded their highest score of the season 107-61. All except two players hit double figures in this game for the Raiders.

Still on a winning streak, Textile disposed of the Bryant quintet easily for the second time. The final score being 85-47.

The Raiders met their first defeat of the season at the hands of Durfee Tech. This game will be discussed many times in the future, because of the action packed last two seconds. Could so much have happened in two seconds? Well, it is recorded so and Durfee Tech walked off the floor winning 71-70.

New Bedford got back on a winning streak again as the Providence Bible Institute fell under the score of 87-48.

In defeating the Worcester Teachers, Textile gained its 14th win of the season. The score read 88-70.

Against Lowell Textile the Trippmen easily avenged the previous year's loss. The Lowell quintet was outplayed throughout the game as the Trippmen pulled away to an early lead and were never threatened. The score looks good in the record books, 82-51.

To defeat Gordon College, Textile had to come from behind in the final quarter to show the host team their superiority. The regular five played the major portion of the game with only one substitute being used. Score 69-59.

Textile pulled the surprise of the year when it defeated Stonehill 75-71. The big third period by Textile was the deciding factor as they out scored Stonehill 31-15. There were no individual standouts in this game for Textile as every man played a superior role. In defeating Stonehill, Textile took over the Conference lead by a half game.

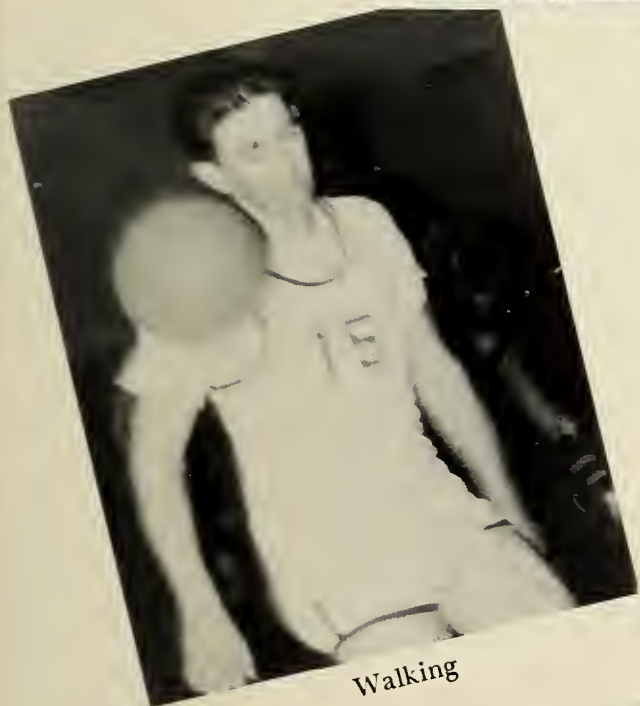

Stonehill came back to avenge that defeat and dumped Textile 89-71. This defeat cost Textile the Conference lead and the Championship. At one time Textile was within six points of Stonehill and it looked as if the Textile Team might have pulled it out, however, Stonehill soon took stock and the outcome was ascertained.

The Raiders traveled to Stamford, Conn. and defeated Saint Basil College 93-48.

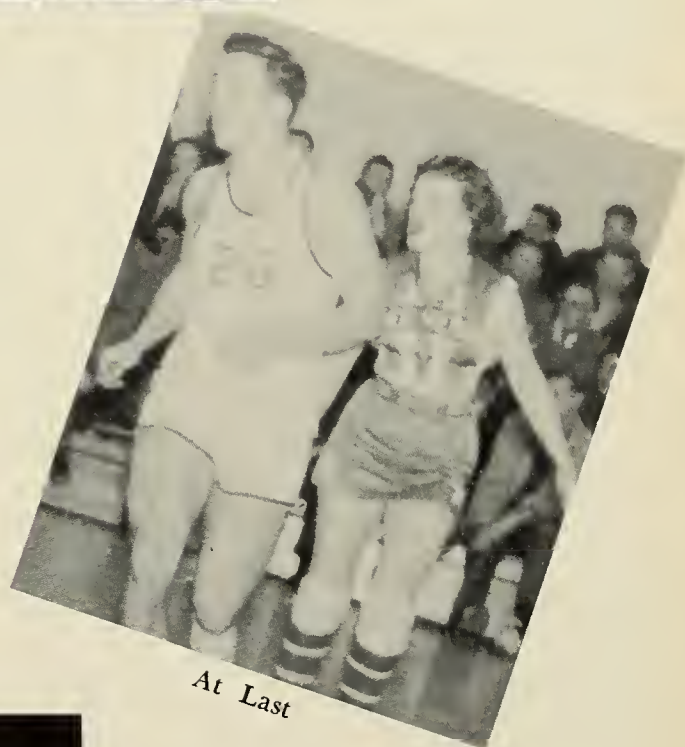

Going on to Philadelphia, the Raiders played their final game of the season. It was a hard fought game, but the Raiders could not shake the stiffness from their legs and fell to defeat 68-62. The trip will long be remembered though, because the team enjoyed itself in New York.

Soccer

A well played and hard fought game against Bradford opened the 1952 season for the NBTI booters. The Durfee Tech men got off to a good start by taking advantage of the inexperienced Red and Grey. In the early minutes of the game, Durfee scored two goals while the NBTI club fought desperately, but to no avail. We lost our opener 4-1; the lone goal being scored by Artzi.

The second game was more of a white washing for the Red Raiders. Bridgewater led throughout the game and won a 7-2 victory. Artzi and Baines contributed the two points for the home cause.

The team next traveled to Lowell Textile only to meet a more experienced and stronger team who took advantage of their ability to score an 8-1 victory. Again Artzi, the pride of the raiders, scored our only tally.

A second meeting with Bridgewater State developed into the most exciting game of the season. Both teams fought hard and missed numerous scoring opportunities. The final score was registered as 0-0.

The Red Raiders were visited by Durfee Tech for the final game of the season. A pass from Baines to Andrade, who booted it into the net, accounted for the lone point and the game for the home team.

The soccer team deserves a word of praise for the outstanding sportmanship it showed during the season. Although most of the players were inexperienced they played with the spirit and the will to win.

Tennis Team

The varsity tennis team comprising international racketeers from Argentina, Brazil, Haiti, Indonesia and America, held to a good record last season.

The team had been scheduled to play against Stonehill College, Bryant College, Durfee Institute, and Bridgewater Teachers College, but owing to the rainy weather of the season, the games with Durfee and Bridgewater were postponed several times and then finally cancelled. Actually the team played only four matches during the entire season — two against Stonehill and two against Bryant.

The Tech racketeers won their opening home match against Stonehill College on the Fairhaven High School court by a score of 4-1. The netmen then swept Bryant College at home and away by a score of 4-1.

In a return match with Stonehill College at Brockton's Y. M. C. A., the racketeers were undoubtedly out of form and suffered their only defeat of the season by a close score of 2-3. This loss created a tie with Stonehill College in the league competition.

Unfortunately, the league championship was never decided. With the season running short, and vacations already underway, three of Tech's players had to leave for their native countries immediately following Commencement.

Under Coach Pacheco, the tennis team is again scheduled to play against Stonehill College, Bryant College, Bridgewater Teachers College, and Durfee Institute during the coming season.

This year's returning lettermen are only Chan-ny Chiu and Red Blanchard. The new members on the squad include Howard Wong, Harry Wrench, and John Gates.

Baseball

The 1952 baseball season ended with the NBTI club and Stonehill College tied for first place. The Raiders won the playoff game and the Southern New England Coastal Conference Baseball Championship.

The playoff was the toughest and most exciting game of the season. Textile won by a score of 2-0 with the superb pitching of Jesse Fernandes. Our runs were scored in the first inning from a walk by Wally England, a triple by Vasco Camacho and a double steal by Camacho and Babe Poitras. The game was tightly played with few scattered hits from then on.

Our coach, Clarry Haskell, used throughout the season a team consisting of Joe Barbero at first, Nobby Rodil at second, Joe Perreira at short, Wally England at third, Jose Martinez in left, Vasco Camacho in center and Dick Lake in right. Babe Poitras and Tom Baines did the catching while Jesse Fernandes and Dick Bachand did the chucking. The remaining players on the squad were Dave Jones, John Viera, George Pappas and Al Sarkes. The team's record for the season was 5 wins and 5 losses. However, the victories game in conference play where they were needed.

The 1953 New Bedford Textile Baseball Team will be minus the services of Jesse Fernandes, Richard Lake and Joseph Perreira. However, Coach Clarry Haskell has a good nucleus to work with and should do all right with the new rookies and the return of Don Thatcher. A 12 game season has been scheduled with a 3 game trip to North Carolina. This trip is the first of its kind in many years for the baseball team.

We believe that it is safe to predict that the 1953 baseball team will have a successful year and probably will win its second straight conference title.

ADVERTISMENTS

ACKNOWLEDGEMENTS

The successful completion of the Fabricator '53 was made possible by the splendid cooperation of many individuals. To all those who in any manner aided in the work of compiling this yearbook, the editor expresses his sincere thanks. He is especially grateful to the many organizations who, through their generous subscriptions, helped to meet publishing costs. The sympathetic interest and helpful suggestions of Miss Jacqueline Boucher and her classmates, encouraged the staff to overcome many difficulties.

"ME NEXT!"

What a wonderful world of color was locked in that magic tube!

Shimmering jewels, a brilliant mosaic—what pictures could be imagined in the tiny wonderland of a kaleidoscope! But careful! Don't jolt it! . . . Or you'll find that your wonderland has gone.

Every color that danced in that miracle tube has been captured by dye scientists for everything that people wear or people use. But these need not be kaleidoscopic colors that change—or unstable colors that fade; they can be colors that last for the entire lifetime of the material.

That's the kind of color fastness that can be yours when you turn to Du Pont for dyes. Our technical service experts will help you find the right dye for the end use—whatever it may be. E. I. du Pont de Nemours & Co. (Inc.), Dyes and Chemicals Division, Wilmington 98, Delaware.

Rohm & Haas Chemicals for the Textile Industry

LYKOPON concentrated sodium hydrosulfite powder for reducing vat dyes and for stripping in alkaline and neutral solutions.

FORMOPON sodium sulfoxylate formaldehyde powder or lumps for discharge and vat printing.

ACRYSOL water-soluble sizes and thickeners for both synthetic and natural fibers.

RHONITE water-soluble urea formaldehyde condensates for crush resistance, stabilization against shrinkage and stretch, added weight and proper handle — all on a durable, washfast basis.

RHOPLEX aqueous, solvent-free dispersion of acrylic resins, for any type of hand desired — durable, abrasion-resistant, full and crisp, moderately firm, or soft and delustered.

RHOZYME concentrated enzyme products for efficient desizing under all conditions.

TRITON synthetic organic surface-active agents for penetrating, wetting, emulsifying, softening, dispersing and scouring.

FORMOPON EXTRA, PROTOLIN W & PROTOLIN SX Zinc hydrosulfites and sulfoxylates for stripping all types of fibers.

LYKOPON, FORMOPON, ACRYSOL, RHONITE, RHOPLEX, RHOZYME, TRITON and PROTOLIN are trade-marks, Reg. U. S. Pat. Off. and in principal foreign countries.

As you enter mill life you will do well to learn all about Reiner equipment, its mill-proven record of all around excellence. The Reiner production program covers a wide range of machines — all top performers in their field. As your responsibilities grow with the years and decisions have to be made — remember Reiner for trouble-free, highest speed quality production in the fields listed below:

High Speed Tricot Machines

Simplex (double knit) Machines

Kayloom Machines

Raschel Machines

Full Width and sectional Warpers

Creels of all types

Auto Heelers

66 Gauge Full Fashioned Hosiery Machines

Automatic Bobbin Winding Machines
(for quilting and stitching)

Automatic Shuttle Embroidery Machines, 10 and 15 yards

— Makers of Quality Textile Machinery since 1903 —

Tops

FOR TEXTILES

VATROLITE®— Use this powerful concentrated reducing agent for brighter vat dyed colors on cotton, linen and rayon . . . for faster, cleaner stripping results on silk, cotton and rayon.

DISCOLITE®— A concentrated reducing agent, highly stable at high temperatures, outstanding for discharge and vat color printing. Employed successfully wherever the reducing agent must dry into the fabric and retain its reducing power.

PAROLITE®—A dust-free white crystalline reducing agent. Soluble, colorless, excellent for stripping wool, wool rags, shoddy acetate or Nylon fabric.

NEOZYME®— Concentrated low temperature desizing enzyme. Removes starch and gelatine. Excellent for eliminating thickeners from printed goods at low temperatures.

NEOZYME® HT—Concentrated high temperature desizing enzyme. Removes both starch and gelatine. Suitable for continuous pad-steam method. Remarkable stability at very high temperatures.

NEOZYME® L & NEOZYME® L Conc.—Liquid desizing enzymes in two degrees of concentration. Remarkable stability at very high temperatures.

CASTROLITE®—A highly sulphonated castor oil used as a staple penetrant for dyeing or bleaching in leading textile mills.

VELVO SOFTENERS #25 & #50— Economical creamy white paste softeners derived from highly sulphonated tallows. Give softness and body without stiffness or affecting whites.

VELVORAY®—A blend of vegetable oils and selected fats for a superior, non-foaming finishing oil. High in combined SO₂ and stability. Excellent for sanforizing, will not smoke off at high temperatures.

DRYTEX®—A high-test wax emulsion type water repellent finish having extreme stability both in the barrel and in diluted form as used. Non-foaming.

DISPERSALL®—Effective retardant for dyeing vat colors, dispersing and leveling qualities, for dyeing naphthol and vat colors, useful in wool and acetate dyeing. Valuable auxiliary in stripping vat colors, naphthols.

NEOWET®—Permits effective wetting at all temperatures—particularly useful with enzymatic desizing agents. No reaction to soft or hard water. Not affected by either acid or alkali chemicals. Non-Ionic.

 Better Textiles

Nopco's Headquarters
 Harrison, N. J.

Whether it be wool, worsted, cotton, silk, rayon or nylon, Nopco textile chemicals are enabling manufacturers thruout the world to profit by economies in processing, and to obtain superior products.

In solving textile processing problems, it always pays to investigate Nopco's outstanding chemical products.

NOPCO TEXTILE CHEMICALS INCLUDE:

Nopco 1921-D

Weaving yarn finish for viscose type rayon yarns applied as an emulsion in the wet finishing operation. Suitable for production of both filling and warp yarns.

Nopco 2169-M

Lubricant for rayon tire cord yarn. Imparts excellent flexibility to the yarns resulting in good strengths. Has unusual heat stability.

INDUSTRIAL GROWTH

Depends in a good measure on ties which bind a community together. Some of these in New Bedford are:

- Plentiful skilled labor
- Good Labor Relations
- Transportation
- Abundant Water Supply
- Excellent Health Regulations
- Fine Recreational Facilities

These with a most cordial and co-operative attitude toward both our existing industries and those who are considering joining our community make

STILL WIDE OPEN

Our American inventors and scientists, backed by our remarkable industrial know-how and skills, may seem to have produced today about everything it's possible to produce. Those with little faith in our country and its future would have us believe so.

But to American youth the gates of opportunity are wider open than ever before. Thousands of new and better ways of doing things, of new products and new developments, will be created by those who properly prepare themselves.

The FUNCTION of the
UNITED STATES TESTING COMPANY
in the
TEXTILE INDUSTRY

- To screen raw materials before they undergo processing.
- To establish quality control over goods in the manufacturing process.
- To evaluate materials before they are adopted for general use.
- To rate finished goods for construction and serviceability.
- To aid in merchandising by Certifying goods worthy of Certification and awarding them the Seal of Quality.
- To solve technical problems of an unusual nature whether the solution involves a simple laboratory test or a complete field research.
- To establish testing standards where none exist and to design and manufacture new testing equipment where the need for these is indicated.
- To settle disputes . . . arbitrate disagreements . . . adjudicate conflicting claims on a basis of impartial, scientific findings.
- To set up measurable standards of serviceability in the various functions of textiles as a guide for the industry and as a measuring rod for comparisons.
- To assist those who are developing new products . . . working on new processes . . . seeking new uses and applications for old products.
- To apply the techniques and methods developed in other industries to the advancement of the textile industry and the solution of its problems.
- To shed light upon every branch of textile manufacture through scientific investigation and to share this light with those who wish to see better.
